

KAMAL SINGH

Senior Software Engineer | Flutter & Android

NewDelhi, India | +918077629772 | singh04.kamal@gmail.com LinkedIn | GitHub

PROFESSIONAL SUMMARY

Senior Software Engineer with 9+ years of experience in designing, developing, and maintaining scalable **Android and Flutter applications**. Proven expertise in **technical leadership**, system design, **clean architecture**, offline-first solutions, and production stability. Strong experience in mentoring teams, owning delivery timelines, and ensuring high-quality releases. Adept at architecture decisions, code reviews, performance optimization.

SKILLS

Core components

- Mobile Architecture & System Design
- Delivery Planning & Deadline
- Management Production Release &
- Incident Management Clean
- Architecture (**MVVM, MVI**) Offline-first
- & Caching Strategies Performance
- Optimization & Stability

Technical

- Mobile: Flutter (Dart), **Flutter Web**, **Android (Kotlin, Java)**
- Architecture: Clean Architecture, MVVM, MVP, State
- Management: Provider, Bloc (working experience)
- Data: SQLite, Room
- Networking: REST APIs, Retrofit, Error Handling Async:
- Coroutines, Multithreading
- UI: Material Design, Responsive Layouts
- Tools: Android Studio, Git, Firebase (FCM, Analytics, Firestore, Storage, Authentication, Cloud Functions)
- CI/CD: Code GitHub Actions (basic)

WORK EXPERIENCE

Biocube Matrics Pvt. Ltd. — Senior Software Engineer (Android)

2022–Present

- Developed an AI-based attendance app with face recognition using ML Kit and CameraX.
- Improved application performance by optimizing memory usage, reducing ANRs, and minimizing crash rates through Firebase Crashlytics
- Integrated Firebase Authentication, Firestore, FCM, and RESTful APIs to deliver secure and scalable mobile solutions.
- Collaborated with backend and product teams on scalable solutions.
- Implemented unit and UI testing using JUnit and Espresso to ensure code reliability and a robust user experience.

B2C Info Solutions Pvt. Ltd. — Senior Android Developer

2020–2022

- Built EdTech applications using Kotlin, MVVM, and Retrofit.
- Implemented Google Maps and improved application performance.
- Managed Play Store releases and testing; coordinated with the Android development team to bridge communication gaps.
- Implemented unit and UI testing using JUnit and Espresso.

Green Web Technologies — Sr. Android Developer

2018–2020

- Developed multiple Android apps with API integration and offline storage.
- Optimized app performance, fixed bugs, and managed memory for stability.
- Published apps to Google Play Store.

Cloud Systems — Android Developer

2016–2018

- Integrated RESTful APIs and implemented efficient data synchronization.
- Improved code quality using MVC/MVP patterns and refactored legacy modules. Optimized app performance, fixed bugs, and managed memory for stability.
- Implemented offline storage with SQLite for smooth low-network performance.

KEY PROJECTS

AttendFy — AI Face Recognition App

AI-based, contactless attendance system that uses live face recognition to eliminate manual or biometric punch systems.

Tech: Kotlin, Android SDK, Jetpack Compose, MVVM, Firebase, ML Kit, CameraX, REST APIs

- Developed the end-to-end Android application using Kotlin and MVVM architecture.

- Implemented real-time face recognition using CameraX and ML Kit.

- Integrated REST APIs and Firebase services for authentication and attendance management.

Google Play: [AttendFy on Google Play](#)

IdenTrip — Biometric Passenger Verification App

Passenger journey application with biometric authentication at checkpoints.

Tech: Kotlin, Firebase, ML Kit, MVVM, Retrofit **Google Play:** [Google Play Store](#)

TruNtrance — AI Visitor & Attendance Management

AI-powered visitor access and attendance management solution.

Tech: Kotlin, MVVM, ML Kit, CameraX, Firebase

- Role: Senior Android Developer | Team size: 6

- Implemented AI-based face recognition attendance and improved attendance processing efficiency.

Google Play: [Google Play Store](#)

CAIG Hub — Agriculture Management Platform

Cross-platform agriculture platform for farmers and inventory management.

Tech: Flutter, Dart, GetX, Firebase, REST APIs

Pragyan — EdTech Learning Platform

Learning platform with video content, curriculum mapping, and teaching resources.

Tech: Java, Kotlin, Firebase, Retrofit, MVVM

- Improved app stability and handled end-to-end Android development.

Google Play: [Google Play Store](#)

Digital Signage — Advertising App

Digital signage platform for updating and distributing advertising content across digital displays. **Tech:** Java, XML, Retrofit, SQLite

- Worked as a Senior Android Developer and handled end-to-end Android development.

Google Play: [Offline link](#)

Punjabi By Nature

Restaurant application enabling users to browse menus, view dishes, and explore offerings through an intuitive mobile experience. **Tech:** Java, XML, Retrofit, SQLite

- Developed the Android application and integrated REST APIs for dynamic content management. Implemented SQLite database and offline support; optimized performance and responsiveness.

Successfully deployed the application to Google Play Store.

EDUCATION

M.C.A. — Master of Computer Applications

Indira Gandhi National Open University | Delhi

2012–2015

B.C.A. — Bachelor of Computer Applications

Makhanlal Chaturvedi Rashtriya Patrakarita Vishwavidyalaya University | Dehradun

2007–2010
